

MINNESOTA STRUCTURAL ENGINEERS ASSOCIATION
YOUNG MEMBERS GROUP

Hands-On FRP Strengthening Seminar

Many of us have heard of fiber-reinforced polymer (FRP) strengthening for concrete structures, but few have ever specified it or even know how to. To address this, Simpson Strong-Tie has offered us the use of their training center in Eagan for a presentation on their Composite Strengthening System followed by a hands-on session where you get to try your hand at installation. We'll head to Fitz's Bar and Grill afterwards for happy hour.

WARNING: FRP installation can be messy! Simpson Strong-Tie will provide protective jumpsuits, but wear jeans/work pants, shirt, and boots that you don't mind getting dirty.

We're on LinkedIn! Click to join the [Minnesota Structural Engineers Association Young Members Group](#).

WHAT: FRP Seminar + Happy Hour
WHO: MNSEA Young Members Group
WHEN: Wednesday, May 25, 2016
3:30 PM — 5:30 PM
WHERE: Simpson Strong-Tie
